PROFILE

Data Analyst with hands-on experience in SQL modeling, Python quantitative pipelines, and Power BI dashboards. TripleTen certified; finishing Data Science program (A2 Capacitación, June 2026). Fluent EN/ES.

TECHNICAL SKILLS

Languages: SQL, Python

BI & Reporting: Power BI, Excel, DAX

Python Libraries: pandas, numpy, matplotlib, **Databases:** MySQL, star schema modeling seaborn, scipy, statsmodels

Analysis: EDA, A/B testing, regression, confidence

Other: Git, PowerPoint, ETL workflows intervals

PORTFOLIO PROJECTS

Northwind Revenue Insights

MySQL · Power BI · Star Schema Modeling

- Designed a MySQL star schema from raw transactional data; built a Power BI dashboard surfacing revenue KPIs, product performance, and regional trends.
- Translated business questions into SQL queries and DAX measures to support category-level and period-level decisionmaking.

EURUSD Quantitative Pipeline

Python · Statistical Analysis · Backtesting

- Processed and analyzed 81,900+ 1-minute EURUSD observations using pandas and numpy, applying confidence intervals and significance testing to validate signal quality.
- Built a backtesting framework measuring strategy performance across 20,000+ operations with documented edge metrics.

End To End Business Analysis

MySQL · Python · cohort retention · A/B Test · Power BI

- Validated and cleaned CSV datasets, calculated core KPIs, built a monthly cohort retention matrix.
- Evaluated the impact of a checkout redesign,
- Delivered two dashboard and provide key takeaways.

CERTIFICATIONS & EDUCATION

Data Analysis Certification · TripleTen · Completed 2026

Pandas, SQL, Python, A/B testing, statistical analysis, data visualization, EDA.

Data Science Program · A2 Capacitación · In progress — June 2026 *Machine*

learning, advanced statistics, Python modeling.
