

Santiago Acosta Barriga

Data Analyst | SQL · Python · Power BI

Bogotá, Colombia | santiagoacostab17@gmail.com | +57 304 674 2454 | LinkedIn | GitHub | Portfolio

SUMMARY

Data Analyst turning messy data into clear decisions — building pipelines, dashboards, and statistical models across the full analytics cycle. Experience spans complex SQL querying, star-schema data modeling, A/B testing, and executive-ready Power BI dashboards, including revenue analysis across \$13M+ datasets and funnel analysis on 7,700+ user cohorts. Currently expanding into Data Science, integrating machine learning and predictive modeling into a strong BI and analytics foundation.

TECHNICAL SKILLS

- SQL:** MySQL, PostgreSQL — complex queries, star-schema data modeling
- Python:** pandas, NumPy, SciPy, statsmodels — data cleaning, statistical analysis, backtesting
- BI & Reporting:** Power BI, DAX, Looker Studio, Tableau, Excel (advanced formulas)
- Other:** Git, A/B testing & hypothesis testing (Z-test), cohort & funnel analysis

FEATURED PROJECTS

- Northwind Revenue Insights** — Personal Project
- Diagnosed a lack of visibility into which products and categories were driving revenue across \$13M+ in sales.
 - Designed a MySQL + Power BI star-schema data model to surface sales trends and profitability by product and category.
 - Enabled data-driven prioritization of commercial decisions based on the highest-performing segments.
- EURUSD Quantitative Trading Pipeline** — Personal Project
- Identified that naive backtests overstate performance due to look-ahead bias, producing unreliable strategy signals.
 - Built a Python backtesting pipeline on 81,900+ EURUSD OHLC observations with explicit bias correction.
 - Delivered realistic, trustworthy performance metrics for strategy evaluation.
- RappiPlus End-to-End Business Analysis** — TripleTen Capstone Project
- Needed to determine whether a proposed product change would actually improve conversion before rollout.
 - Ran a PostgreSQL-based funnel and cohort analysis with A/B testing (Z-test, $p < 0.05$) across 7,700+ user cohorts, from raw data cleaning to dashboarding.
 - Statistically validated the impact of the change and delivered a Power BI dashboard for ongoing monitoring.
- Netflix User Behavior & Churn Analytics** — Personal Project
- Addressed the lack of an early-warning system for identifying users at risk of cancelling.
 - Analyzed 210K+ raw records across 8,499 users to build a Power BI churn and engagement dashboard.
 - Pinpointed the highest-risk user segments to inform retention efforts.

PROFESSIONAL EXPERIENCE

- Vehicle Rental Support Specialist — Teleperformance** Sep 2025 – Oct 2025
- Diagnosed root causes of customer and account issues in a fast-paced, English-language support environment.
 - Maintained precise records across CRM and internal systems, supporting fast, accurate decision-making with incomplete information.
- Credit Card Collections Specialist — Concentrix** Jul 2024 – Aug 2024
- Communicated clearly under pressure in English with international customers to resolve account issues.
 - Applied structured problem-solving and data accuracy in a high-volume, metrics-driven environment.

EDUCATION

- Data Analyst Bootcamp — TripleTen** Completed
- Data Science Program — A2 Capacitación** In progress
- Mechanical Engineering — Universidad de los Andes** 2018 – 2023
